PORTFOLIO:

Configuration and Data Merging

Description:

This project was basically to merge two organizations into one. So I merged the data and configuration of the new company with the old company without harming the existing Configuration and without losing the data to merge into one.

Responsibilities:

- Created a planned design document without harming existing architecture.
- Collaborated with Client-side team members to define business requirements in order to make the most effective use of the Salesforce system.

Brokerage Negotiating System

Description:

Creating an automated Salesforce org for a Real Estate brokerage company. I have also implemented multiple integrations with third-party apps and APIs, including 123 Form Builder, Property Base, Gmail, Calendy, Active Campaign, etc. Developed custom forms, reports, and dashboards using Visual Force Pages and Lightning Components.

Responsibilities:

- Custom development using Apex Triggers, Apex Classes, Apex Batch classes, Scheduler classes, Apex Test classes, and Visualforce pages.
- Extensive Process automation using Process Builder and Workflows Rules.
- Third-Party Integration with Active Campaign, Agency Express, please connect me, Veya, and Xero.

Data Migration and Cleanup

Description:

This project is basically used to migrate records of Order, Product e.t.c as per the requirement and if unused records need to be removed from Cloud. So basically update the records as per the requirement. Based on Quote to Cash Process.

Responsibilities:

- Assist in the facilitation of business process reviews to pinpoint
- Set up the Sales Cloud and Salesforce CPQ solutions.
- Create technical specifications as needed for internal developers. Manage client communications and all project-related aspects Successfully.
- Provide documentation and training for end users.

Crew time tracker

Description:

This Project is for storing the information for the foreman crew members who are working on the field, to track the information of the site. Also worked on automation parts like creating a pdf of the site work statement, sending emails to the manager, and auto-end service appointment if the worker forgets.

Responsibilities:

- Take an active role in documenting, improving & maintaining the Salesforce Standards.
- Develop the functionality using the Aura for the Salesforce1 App.
- Worked on Automation tools like Process Builder, Flows, Email Alerts, Apex Triggers.
- Involved in integration of one drive to Salesforce org.

E-Commerce

Description:

This project is an Ecommerce Site with Salesforce B2C Commerce development. Which use to sell products on e-commerce platforms with a limited inventory of food packages. With features like coupons for discounts and shipping tracking and integration for payment with PayPal.

Responsibilities:

- Proficient in managing the administration of Salesforce B2C.
- Customized Salesforce CRM pages. Developed visual force pages and Apex classes using salesforce design patterns to implement business logic using data collections like List, Set, and Map.
- All aspects of Salesforce Application development including Demandware, CloudCraze, Salesforce Commerce Cloud, Salesforce CRM, Salesforce Sales Cloud, Salesforce Service Cloud, Salesforce Marketing Cloud, and Salesforce Community Cloud.
